"Weaving Made Easy", well, makes weaving easy. It includes eighteen simple projects made on a simple rigid heddle loom. A perfect blend of fun and functionality, the rigid heddle is small, portable, and affordable. Weaving compliments and extends all the other fiber crafts: sewing, knitting, spinning, crochet, and more. It's the fastest way to create a scarf using popular knitting yarns; the easiest way to create one-of-a-kind fabrics for clothing, accessories, and home decor. Anyone can learn, using nothing more than their hands, their imagination, and their third-grade math. "Weaving Made Easy" shows how to make sinuous, drapery fabrics; sturdy, practical fabrics; fun, funky

fabrics. Projects range from scarves and tops to bags and belts, from pillows and placemats to rugs and blankets. Eighteen projects with complete instructions, clear step-by-step photographs, and abundant tips and techniques for color, design, construction, and embellishment make this the ultimate idea book for the would-be weaver.
