Over the past few years there has been a resurgence of interest in street art as a genre of artistic expression. Photographer Sven Zimmerman has been at the forefront of this renaissance, surveying the streets, sidewalks, and facades of his home town for the most arresting, humorous, politically savvy, angry, and just plain outrageous examples of street art. In this second volume he continues to look at the modern city with a fresh eye and to pay attention to images we might otherwise fail to notice. Similar in layout and design to the first collection, and graced with the same vibrant color and impeccable composition, Berlin Street Art 2 offers further compelling proof that the urban landscape is teeming with artistic masterpieces, if you just know how and where to find them.
