This is a book for anyone interested in 'discovering' the varieties, qualities and characteristics of Italian wines, now more widely available outside Italy than ever before. Part II provides a fascinating personal 'encounter' with many of Italy's more widely known wines and will be of interest also to the connoisseur. There is much else that informs and entertains in this volume, from discussions on the history and development of wine-making, drinking and storage, to the art of eating and drinking.
