

The State of Working America 2008/2009

"This book is our nation's report card on how the economy is performing—not just for the class that owns private jets and more homes than they can recall—but for the other 99 percent of us as well. Read it and weep. Better yet, read it, wrap it, and send it off to all your elected representatives."

—BARBARA EHRENREICH, author of *Nickel and Dimed*
