A guide to the practice of stem cell transplantation, its status in the treatment of various disorders and the problems that arise after transplantation, aimed at the whole

transplant team.

An up to date guide to best practice in the use of stem cell transplantation, covering current status in the treatment of malignant and non-malignant conditions, practical aspects and problems such as infection and graft versus host disease. Has a practical, accessible approach with free use of algorithms, list tables. Aimed at the whole transplant team - this is an interdisciplinary field. International contributor team with editors in the UK and USA. Illustrated in colour throughout.
