Super Babies may be little, but they' re BIG on adventure. Take a nap when there's fun to be had at the playground? Not Mia! Take a bath when you and your dog can go out exploring? Not Max! These busy babies have places to go and exciting missions to accomplish. Salina Yoon introduces these charming new characters in a bright and playful toddler book with two separate stories. With directional words describing where they' re going and brightly colored animals to identify, this will be a lively lap read.
