Babies and toddlers use a language all their own. To them, every coo, smile, grunt, raised fist, kick and scream is full of meaning — but often parents can't understand what they are trying to tell them. Now parents can decode their child's body language with Baby and Toddler Body Language Phrasebook.

- Facial expressions, body language and sound represent the beginnings of human communication. This useful book helps parents understand the different stages of their child’s development.
- All of the most common behavioral traits of babies and toddlers are examined in detail.
- Each spread focuses on one behavior, shedding emotional and cognitive insight into your child’s development.
- This book eases frustrations and helps build understanding and bonds.
