"Spin Dye Stitch" teaches readers the basics of making and using unique, beautiful handspun yarn. Starting with the most basic information, readers learn about the fibers and tools needed for hand spinning, including tips for making their own basic

tools to get started without spending a lot of money. Next, simple, clear instructions show the reader how to make yarn by drop spindling and wheel spinning. Readers also learn to dye fibers before or after spinning using safe, easy-to-use dyes. Finally, several small projects introduce ways readers can use their handspun yarns, including knitting, weaving, embroidery and needle felting. There is a bonus gallery of handspun and dyed yarn from some of the foremost fiber artists working today that rounds out the book.
