The experts at Fine Woodworking believe that good furniture design goes hand in hand with good furniture construction. "Practical Furniture Design" provides woodworkers with the advice they need to design their own projects by offering thoughtful insights on the design process, ideas for creating working drawings and information on how to

solve construction problems. Each article in this collection, written by some of the best furniture designers and builders, is packed with practical and down-to-earth advice. The furniture types include tables, casework, cabinets, chairs and a selection of special-purpose furniture; illustrated with over 300 photographs and almost as many drawings!
