This book teaches children how fascinating as well as fragile our rainforests are. Mrs. Knoodle and her class go on a magical trip to the Amazon Rainforest. Along for the ride is Little Bug and Pedro the Parrot. There, they learn about the rainforests and deforestation. Back in the classroom, they all grow saplings and plant them in the schoolyard. Like the other books in the series, get to know Mrs. Knoodle, her class and the little friends more and more. Includes the recycling pledge, fun activities and a special rainforest song. This book is exceptional for introducing rainforest conservation in a simple and entertaining way.
