The collected papers from this symposia provide scholars, students, and practitioners with access to the newest work of top tier scientists in psychology. Volume 35 addresses issues relevant to disorders of development and presents their processes and findings. It covers the translation of research on learning, attention/attention deficit, and early conduct problems into practice at a clinical and policy level. In addition, it explores cutting-edge issues in the field, heralding critical up-and-coming areas of scholarship. Academic researchers in developmental psychology, as well as developmental psychopathology will look forward to this volume.
