Are Staboteurs(TM) in Your Midst? Every workplace has them ... the pit bulls that hide

behind lipstick and designer clothes; snakes who flick their abrasive tongues and voice at any and all; the scorpions who sting with a slap of their heavy backhand; the skinks that seem innocent until you get in their space; and the slugs ... those who are 'just there' and breathing, barely. Stabotage! (TM) reveals how to effectively deal with the bad girls and boys that inhabit and breed in every workplace environment ... be it one that work is paid for or hours are volunteered within. Workplace pioneer, Dr. Judith Briles has revised her confrontation and reveals the all new CarefontingScript (TM) ... guaranteed to change the a confrontation outcome. Staboteurs intentionally undermine or disrupt others; there's nothing unintentional about their behavior. Huge sums of money are lost annually. With Stabotage!, the latest study completed in 2008 is revealed. The health care workplace is sick ... Stabotage! is what the doctor should order.
