Diana Yakeley offers expert guidance on choosing the best size and shape conservatory for your space. No conservatory would be complete without proper attention to the

finer details, and a section on interior styling covers lighting, colour schemes, furniture and soft furnishing. A beautifully illustrated chapter on planting contains suggestions on the best plants for achieving different effects, with advice on planting for form, colour and scent; sculptural planting schemes; and growing a wide variety of plants. There then follows a section of basic step-by-step techniques, as well as an informative directory of the most suitable plants for conservatory conditions.
