Connect with science. Connect with students. Connect with Feist and Rosenberg's Psychology. In Psychology: Making Connections, Greg Feist and Erika Rosenberg provide the tools for students to make meaningful connections with the material encompassed in Introductory Psychology while still presenting psychology as a scientific endeavor. With its focus on connections, Feist helps your students to understand both the discipline and concepts of psychology as well as psychology's relevance to their lives. Feist provides you with the science you are seeking while bringing it alive for your students in an accessible way. By challenging students to make connections between what they are reading and learning about in class and the world around them outside the classroom, Psychology: Making Connections fosters students' critical thinking skills. At the same time, the authors consistently reinforce the idea that science is a process and not just a collection of resulting outcomes to be memorized. In doing so, they bring to life the names and experiments on the page and vividly illustrate the human element in the scientific method.

评论

推荐里面的网上测试和作业。就书而言，还行。不过心理学导论的书都大同小异的~

-----  
比看过的上一本PYYSCHOLOGY7强多了
