出版时间:2009-6-4

装帧:Hardcover

isbn:9781603273800

This is the second edition of the comprehensive, concise summary of apoptosis research. It covers the major concepts, molecular architecture, the biochemical pathways, and pathophysiological significance of apoptosis. This book provides a guideline of standard biochemical and cell biologic approaches to apoptosis bench work with an emphasis on translational clinical applications for immune disorders, cancer research, ischemia, and neuronal degeneration. Since the original publication in 2003, the apoptosis field has expanded rapidly and chapters not only need to be revised and expanded, but there is a need for all new chapters covering exciting advances in bioinformatics, systems biology, oxidative stress, etc.
