When restoring classic cars the devil is in the detail - and often in the small pieces of decorative trim and hardware. One of the best car restorers in the business provides step-by-step instructions for getting those essential details just right, whether it is

replacing a part or section, repair, or simply polish or chrome. Step-by-step instructions, guidance, advice guide the reader through each step, accompanied by colour photographs. Master craftsman Jeff Lilley covers the repair of stainless steel and aluminium trim, decorative strips, fenders, bumpers, hubcaps, wheel covers, door and trunk handles and more - making this the complete, indispensable guide for anyone putting the finishing touches to their car.
