Now you can create a perfect-to-give, easy-to-use, beautiful-to-keep digital record of your golf scores for every round, on every course. Step-by-step software—Mac or PC compatible!—comes with templates, simple instructions, and full-screen shots to show the user how to use the files, customize the records, and print them out. These features let the player keep track of details like course, weather, time, other players, yardage, and par for each hole, and even add photos! The book covers golf instruction, tips, handicaps, terminology, score-keeping, and how to use the software. No other golf record keeper includes software, and no how-to-golf computer programs allow the user to create such detailed and customized print-outs. This special edition is perfect for gift-giving or to track your own progress as you tackle the back nine, traps, hazards, and the urge to throw your clubs out of the cart!
