Hereas a touch-and-feel board book that babies will love. The delightfully bright and simple color illustrations on every page show all the many things baby is familiar with: his clothes, his pajamas, his stuffed animals, his bouncing ball, his other playthings, and the objects in his bedroom. He brushes his teeth and says anight-night to them all before climbing into his crib and going to sleep. Texture patches for babies to touch and feel appear on many of the pictures. Baby hugs a soft, woolly blanket on the front cover, and toddlers can touch silky, red curtains at the bedroom window, feel the leather-like spots on a toy giraffe, and caress the furry texture of a teddy bear. Parents and babies will love sharing anight-night time as they

enjoy turning the pages of this attractive book together.
