Set in the heart of Europe and full of lakes, forests, and mountains, Poland has a wealth of attractions, from wild animals that have disappeared from the rest of Europe to some of the most beautiful examples of ancient amber in the world. Poland's rich history and folk traditions, its lively storytelling and cooking traditions all combine to make a special way of life that Poles take with them wherever they go. This new entry in the popular World Alphabet series pays photographic tribute to 26 of the best attractions the country has to offer.
