Lamborghini 360[degrees] implies a full, innovative, all-around view of this fabulous automotive icon. Forty years on, it is now truly appreciated for its position in the world of supercars. It is without question the first by any definition, the purest of them all. This book combines the time honoured technical and numbers story with a new social view illustrated throughout by stunning and newly found photography. But the piece de resistance is the exhaustive, unique series of interviews undertaken with the original players on the Lamborghini stage from the cars very beginnings. Here we have first hand stories from those involved...the designers; the engineers; the artisans; the business, sales and PR people; customers, journalists and observers. Beautifully designed and created with top notch materials, written by two authorities with great skill, this new book will take you back to where the supercar began.
