Everyman's guide to classic cars, "Ran When Parked" - is the perfect balance of hard-nosed information and data with dozens of stories of contemporary living with classic cars. That means lustng after, buying, selling, driving, maintaining, even scrapping. Classic cars are defined as both affordable and interesting cars built since 1950 that can be run everyday and cost under \$20,000 US. Sass has been frantically buying and selling classics since high school, and is along time classic car expert to "The New York Times", to "Sports Car Market" magazine and "Cars That Matter" where he adds commentary about values. Learn how to run an MG or a Jaguar on a librarian's wage with running costs of less than a Toyota Prius!
