In *A Ticket to Work*, Bettina Kohlrausch examines the differing approaches taken by Britain and Germany to assisting young people with the often difficult transition from school to full-time work. Detailing the workings of such programs as skills training and job-placement assistance, the volume places those vocational training methods in the context of the general political and economic climate of the two nations, drawing a contrast between Britain's more liberal market economy and Germany's more structured and coordinated regime.

作者介绍:

目录: 1 Introduction.

2 Bridging Institutions and Life Courses: Why Skills Matter for the Analytical Frame of the reference.

2.1 Why Institutions Matter – The New Institutional Approach.

2.2 The Life-Course Approach.
