Doreen Woods lives an ordinary life. She is a respected dentist, her son has just graduated from high school, and her husband teaches fifth grade. The one flaw is that her brother, Adam, has MS. Even that isn't all that extraordinary. . . . Then, out of nowhere, Janey Marks shows up, bringing the past with her. In 1971 Doreen was young, idealistic Lucy Johansson. Adam was back from Vietnam, damaged and bitter. Caught up in the anti-war movement Lucy committed a crime that changed everything for both of them. "She Was" spans America, coast to coast, over four decades, to give us the story of one young woman who, like many of her generation, tried to change the world and how, thirty-four years later, in a world that still needs changing, she must pay the consequences.
