Compiled by a successful photographer and former teacher of English, this collection of black-and-white photographs is accompanied by a wide variety of inventive writing prompts to motivate students. In addition to the author's own suggestions for using

photography in the classroom, the guide shares more than two dozen ideas from real teachers across the country who have successfully used photography in the teaching of writing. The book also includes a CD-ROM so that teachers can use a video projector to display the photographs and writing prompts.
