出版者:Springer

出版时间:2009-3

装帧:Paperback

isbn:9783540699354

For more than two decades, this work has remained the leading advanced textbook

and easy-to-use reference on food chemistry and technology. Its fourth edition has been extensively re-written and enlarged, now also covering topics such as BSE detection or acrylamide. Food allergies, alcoholic drinks, or phytosterols are now treated more extensively. Proven features of the prior editions are maintained: Contains more than 600 tables, almost 500 figures, and about 1100 structural formulae of food components - Logically organized according to food constituents and commodities - Comprehensive subject index. These features provide students and researchers in food science, food technology, agricultural chemistry and nutrition with in-depth insight into food chemistry and technology. They also make the book a valuable on-the-job reference for chemists, food chemists, food technologists, engineers, biochemists, nutritionists, and analytical chemists in food and agricultural research, food industry, nutrition, food control, and service laboratories. From reviews of the first edition "Few books on food chemistry treat the subject as exhaustively...researchers will find it to be a useful source of information. It is easy to read and the material is systematically presented." JACS

作者介绍:

目录: Introduction

0 Water

1 Amino Acids, Peptides, Proteins

2 Enzymes

3 Lipids

4 Carbohydrates

5 Aroma Compounds

6 Vitamins

7 Minerals

8 Food Additives

9 Food Contamination

10 Milk and Dairy Products

11 Eggs

12 Meat

13 Fish, Whales, Crustaceans, Mollusks

14 Edible Fats and Oils

15 Cereals and Cereal Products

16 Legumes

17 Vegetables and Vegetable Products

18 Fruits and Fruit Products

19 Sugars, Sugar Alcohols and Honey

20 Alcoholic Beverages

21 Coffee, Tea, Cocoa

22 Spices, Salt and Vinegar

23 Drinking Water, Mineral and Table Water
