Reinforcing basic concepts with everyday, easy-to-grasp examples, this highly regarded volume remains the standard introduction to meteorology and the atmosphere -- components, problems, and applications. The Eleventh Edition retains hallmark

Tarbuck/Lutgens features: a friendly, largely non-technical narrative, timely coverage of recent atmospheric events, and carefully crafted artwork by leading science illustrator Dennis Tasa. The authors continue to provide current reports, including discussion and photos of "Super Tuesday" (the day of many 2008 presidential primaries) and the tornado outbreak in 24 states. The chapter on climate change is updated to include the findings presented in the fourth assessment of the Intergovernmental Panel on Climate Change. The book's Companion Website is fully updated.
