This "Fire and Rescue Manual" is the first manual within the "Fire Service Operations" series dedicated to the protection of the environment. This publication provides information and guidance designed to support firefighters, Fire Brigade Service managers, and trainers in their work at operational incidents, training events, and during day-to-day activities. This manual contains guidance for Fire and Rescue Services on preventing and if necessary, dealing with incidents with the potential to pollute. Through its guidance this manual also ensures that services can help minimise their own impact on the environment by providing advice on how to prevent pollution from their own premises.
