The Workshop 'Science with the VLT in the ELT era' was organised by ESO as a forum for the astronomical community to debate its expected future use of ESO's Very Large Telescope (and its VLTI interferometric mode) when other facilities such as ALMA, JWST and, hopefully, at least one extremely large 30-40m class telescope will be operating. VLT/I science highlights were presented, future science priorities argued, synergies between the VLT and the future facilities confirmed and specific new VLT/I instruments proposed.
