"The New Baby Answer Book" is a must-have shelf reference covering all the key topics from birth to kindergarten, such as sleeping, eating, daycare, safety, discipline, fears,

preschool, independence and more. This book uniquely addresses those questions a parent may not ask their pediatrician, might not get satisfactory answers for from their friends, and won't find answered so clearly in other books on child rearing. Authored by a child development specialist and parenting coach on the faculty at Johns Hopkins University, "The New Baby Answer Book" includes 150 of the most common questions new parents ask, including: Should I pick my baby up when he cries? Is it okay to give my baby a pacifier? Why is my child afraid to have a haircut? What should I do if my child is being picked on? Why does my child bite? Is it OK to bribe children?
