After being teased one too many times, Ignatius MacFarland decides to build a rocket. Maybe extraterrestrials are nicer than his classmates But when his rocket takes an explosive wrong turn, Ignatius ends up in another frequency run by former English-teacher-turned-dictator, Chester Arthur. Mr. Arthur has taken the art, culture, and advancements of our world, shared them with this new frequency, and convinced

the creatures around him that hea (TM)s a genius. Ita (TM)s up to Iggy and Karen, another trapped frequenaut, to expose Mr. Arthur for the fraud that he is a " and to hopefully make it home alive. Part comedy, part science fiction, and part fantasy, this debut novel makes being a geek, well, kind of cool.
