isbn:9780387898384

Using a multi-disciplinary approach to the diagnosis of pulmonary disease, this unique atlas will offer the busy practitioner a quick and reliable tool crossing over traditional boundaries and will be useful not only to pathologists and cytopathologists, but also

to pulmonologists, internists, endoscopists and radiologists as well as students and residents in training. The atlas will contain a profusion of images (320 in color) accompanied by descriptive text and a restricted number of highly selected references.
