Welcome to Newport Beach, California--a community often found glittering in the spotlight, but one that isn't always as glamorous as we imagine. Through the lives of waiters and waitresses, divorced and single parents, and alienated teens, Victoria Patterson's "Drift" offers a rare and rewarding view into the real life of this nearly mythical place, all the while plumbing the depths of female friendship and what it means to be an outsider. Fresh, energetic, deceptively powerful and delightfully frank, hers is a voice you won't be able to stop reading.
