For anyone who's ever had trouble rendering the human face, the newly expanded and revised edition of "Carving the Human Face", is the ticket to creating realistic portraits. From a world champion carver known for his lifelike busts, this updated book includes new patterns and photographs, in addition to valuable information on techniques for creating realistic hair, facial features, realistic skin and muscle, hats and head dresses. Phares provides tips for fixing common anatomical errors and information about proper tool use. This title features an exhaustive step-by-step project, including over 350 demonstration photographs, that guides readers from a block of butternut to a finished mask of a Native American warrior. It also includes a gallery of Jeff Phares' amazing work that offers untold inspiration too!
