More than any other psychology textbook, Don and Sandra Hockenbury's "Psychology" relates the science of psychology to the lives of the wide range of students taking the introductory course. Now "Psychology" returns in a remarkable new edition that shows just how well-attuned the Hockenburys are to the needs of today's students and instructors. "Psychology" began with a basic idea: combine scientific authority with a narrative that engages students and relates to their lives. From decades of experience teaching, the Hockenburys created a book filled with cutting-edge science and real-life stories that draw students of all kinds into the course.
