LEARNING THROUGH PLAY One of the best ways for children with autism, Asperger's, and sensory processing disorders to learn is through play. Children improve their motor skills, language skills, and social skills by moving their bodies and interacting with their environment. Yet the biggest challenges parents, teachers, and loved ones face with children on the autism spectrum or with sensory processing disorders is how to successfully engage them in play. Pediatric occupational therapist Tara Delaney provides the answer. In 101 Games and Activities for Children with Autism, Asperger's, and Sensory Processing Disorders, she shows you how to teach your children by moving their bodies through play. These interactive games are quick to learn but will provide hours of fun and learning for your child. And many of the games can be played indoors or outdoors, so your child can enjoy them at home, outside, or on field trips. More than one hundred games that help your child: make eye-contact, stay focused, and strengthen his or her motor skills associate words with objects and improve language and numerical skills learn how to interact with others, how to take turns, and other social skills needed for attending preschool and school

评论

(2017.23)想找一些ABA therapy里面能用的ideas，但大部分activities都是日常和家长做感觉更好一些，实际感觉自己可用的不是很多。但分类和rationale还不错，家里有ASD孩子的话应该还是挺实用的。
