This is a unique compilation of cross-cultural and international attitudes towards adoption research and outcomes. Whilst informal adoption of children has probably always existed across all human societies, this work is timely in that interest in the role of legal adoption as both a child welfare solution and as a means of alternative family formation for adults wanting to become parents has never been higher. This book is an edited collection of 13 papers based on invited keynote presentations or paper symposia presentations given at the Second International Conference on Adoption Research (ICAR2) 2006. It gives a unique Cross-cultural look at adoption from worldwide, multidisciplinary community of distinguished and emerging adoption researchers. International appeal, with different countries laws, attitudes and outcomes fully explored
