From the reviews: a a]is a must for most bioinorganic research labs.a (TM) (Peter Sadler, Chemistry World, June, 2009). These sulfur-rich chelators, being important in metal ion homeostasis, find increasing attention. Metallothioneins and Related Chelators written by 30 internationally recognized experts, focuses on this hot topic. The reader is supported by about 20 tables, more than 80 illustrations and nearly 2000 references.
