As former President and Chairman of a leading stockbrokerage firm for nearly 20 years, it is my desire through the publication of The Stockbroker's Ripoff! to show investors how to get stockbrokers and financial professionals to refund their losses without a lawyer. Once investors become aware and learn of the many hidden violations described in this book that may be occurring in their accounts, I will show you how to contact the regulators and where to file a complaint! Investors who know the simple facts disclosed in this book have recovered sums ranging from \$1,000 \$10,000 \$100,000 and more from their broker or financial professional without the cost of a lawyer. You will be stunned to learn how stockbrokers and financial professionals violate the rules, which they are required to follow once they become licensed. Because of their tremendous greed to obtain large commissions, profits, and fees violations occur frequently and undetected for the greater part of their careers . . . it merely prods them on! I believe that if investors knew all the violations that have occurred in their accounts in the past few years investors could have recovered billions of dollars in claims. Once you complete reading The Stockbroker's Ripoff! and have reason to believe violations have occurred in your account I urge you to pursue your claims immediately. We would be delighted to hear about your success stories and can be emailed to usinvestorsprotection.org After reading The Stockbroker's Ripoff!, if you have any reason to believe violations have occurred in your account, I encourage you to pursue them and keep us informed as to the success and results of your actions. It is my true desire to help investors! Without investor confidence in our capitalistic system, America and free enterprise cannot and will not survive.
