Gerontology for the Health Care Professional, Second Edition is a comprehensive, practical text covering the evolving field of gerontology, written for health care students and professionals. This text is clinically relevant while implementing theoretical treatment of the subject matter. This text instills an appreciation for the multidimensional aspects of aging for those who are working with and caring for elderly patients or clients. Written by experts across many health professions, Gerontology for the Health Care Professional, Second Edition presents an up-to-date and realistic view on the aging process. With topics presented in an introductory fashion, this book covers all the important aspects of aging. Each chapter includes objectives, chapter outlines, multiple-choice review questions and learning activities!
