Nutrition and Diet Therapy: Self-Instructional Approaches covers the fundamentals of basic nutrition, and then nutrition as therapy, in both adults and children. It is designed to work as a traditional text or a self-instructional text that allows for distance-learning and self-paced instruction. Progress checks throughout each chapter and chapter post-tests help students to evaluate their comprehension of key information. The Fifth Edition has been completely revised and updated to include My Pyramid and corresponding DRIs and all of the all figures and tables have been revised.
