MediQuik Drug Cards are a portable guide that help nursing students learn about drugs, their uses, interactions, reactions, administration techniques, and more. Nursing students preparing for the NCLEX® or any practicing nurse needing a quick reference to drugs will find this deck a valuable tool in both educational and professional nursing settings. Boxed with a plastic sleeve for carrying selected cards, the drug cards contain generic and trade names; drug name pronunciations; adverse reactions classified five ways; interactions classified as drug-drug, drug-herb, drug-food, and drug-lifestyle;

route-onset-peak-duration tables; patient assessment; key nursing diagnoses; planning and implementation, including patient teaching; and evaluation of patient outcome. In addition to specific drug information, the cards provide a quick-read format; nursing process organization on all drug cards; prototype drugs for all classification cards; dimensional analysis for calculating dosages; illustrated drug administration cards; and cards on common herbs. Symbols and clear headings eliminate the need for searching through pages and pages to find needed information.
