出版时间:1998-1

装帧:

isbn:9780195092981

This casebook will be a supplement to textbooks used in teaching the Abnormal Psychology course at the undergraduate level. The cases will be first-person narratives from the most eminent clinicians in the field and will allow readers an opportunity to become involved in the clinical processes of assessment, diagnosis, and treatment. Each case highlights the essential features of the disorder and will describe the difficulties the author encountered when assessing and treating it.
