出版时间:1998-12

装帧:Hardcover

isbn:9780393046502

Beginning with the Babylonian and Egyptian mathematicians of antiquity, Ivor Grattan-Guinness charts the growth of mathematics through its refinement by ancient Greeks and then medieval Arabs, to its systematic development by Europeans from the Middle Ages to the early twentieth century. The book describes the evolution of arithmetic and geometry, trigonometry and algebra, the interplay between mathematics, physics, and mathematical astronomy, and "new" branches such as probability and statistics, "succeeding masterfully in viewing the history of mathematics from a new perspective".
