This vibrantly illustrated series focuses on the life, habitat, and special characteristics of the wild animals of North America.-- Each title blends Smithsonian-verified scientific information with an entertaining story.-- Glossary spotlights important plant and animal names.-- Read-along cassettes include authentic sound effects and page-turning tones.-- Toys authenticated by Smithsonian Institution curators for realism.An Atlantic puffin and his mate meet annually on a high bluff of an island off the coast of Maine. Puffin's mate bears a single egg from which a hatchling is nurtured to maturity. Finally the day arrives when the now colorfully-plumed young adult must

fly off into the distant ocean. The first flight is easier said than done
