"Benson's Short" is designed for a 1 or 2-semester A&P course where no single dissection specimen is used. In addition to the dozens of effective exercises, this lab manual is unique in that students are asked to label many of the figures to reinforce concepts. It is self-contained, detailed, and very logical in its approach. Because of its detailed content (textual material, line art, photos, and histology micrographs), it is

generally not necessary to take the course textbook to the lab.
