"Occupational Therapy for Child and Adolescent Mental Health" is a practical textbook

which provides occupational therapists working in this area with a theoretical framework for practice. It outlines the work of the occupational therapist in this area of mental health and introduces a variety of theoretical approaches and therapeutic interventions used with child and adolescent mental health clients. The role of the occupational therapist as part of a multidisciplinary team is emphasised throughout. This textbook will fill a real gap in the literature for occupational therapists, students and practitioners alike. It will also be welcomed by members of the other health care professions in the multidisciplinary team who need to understand each others roles so that they may work together more effectively.
