This volume fills a research gap of striking proportions by exploring the contingencies that mediate the crimes perpetrated on those who are themselves perpetrators. The notion that violence is something that happens only to law-abiding citizens is both widely held and inaccurate. The disproportionate share of victims of crime are, in reality, themselves involved in crime. Yet existing scholarship has failed to explore the contingencies that mediate offenses like drug robbery from the forces that inspire it, to the methods used to select targets, to the means employed to generate compliance, down to the tactics used to thwart retaliatory attempts after the crime has ended. This work is innovative and troubling at the same time. It takes a theme that Hollywood films have explored in greater depth than social science, and restores it as a crucial part of the ethnography of crime.
