This work is a complete guide to the Mongolian language. In fourteen lessons it provides a basic knowledge of all Mongolian noun inflexions and the basic and most important verbal inflexions, and the uses of these. Grammatical concepts are introduced in a text at the beginning of each chapter and discussed, with further examples, in a grammar section. These are then tested through drills involving repetition in differing situations and with different items of vocabulary, and through exercises involving translation from English to Mongolian and vice versa, and answering questions in Mongolian. Each chapter is accompanied by a list of new vocabulary items introduced in that chapter. A complete vocabulary list, English-Mongolian and Mongolian-English, is given at the end of the book, as is a list of all the Mongolian terminations, inflexions and stems, in alphabetical order, that appear

in the book.
