Molly remembers the good times living aboard Emerald Eyes. She remembers watching the sunsets and the dolphins. She remembers how her father would say that dolphins were a sign of good luck. Those were happy days. But now the dolphins are gone, and happiness seems to have died with Molly's father. Carole Crowe's deeply felt novel explores the conflicted emotions that one girl feels in the wake of her father's death, and the interior journey she must make before she finds peace with herself and understanding with her mother.
