New Advances in Analytical Chemistry, Volume 3 presents recent developments in various spectroscopic techniques such as NMR spectroscopy and mass spectroscopy

in the form of comprehensive reviews written by leading authorities in the field. With new and updated information. the book is invaluable to both research students and postdoctoral workers who wish to keep abreast of frontiers in analytical techniques. Each chapter provides a broad overall account of recent developments, so that the readers can stay current not only with the authors own contributions but also with contributions of other eminent scientists working in this area.
